CYBERSECURITY ANALYST | SOC OPERATIONS | INCIDENT RESPONSE | DFIR

U.S. Coast Guard veteran and security operations professional with a B.S. in Computer Science, and the HTB Certified Junior Cybersecurity Associate certification. Hands-on experience investigating Windows, Linux, authentication, endpoint, and network telemetry with Microsoft Sentinel, Splunk, KQL, SPL, Sysmon, and forensic tools in authorized labs. Professional background includes real-time security monitoring, incident coordination, compliance, controlled-asset accountability, technical reporting, and SOP development.

CERTIFICATION AND TRAINING

- **HTB Certified Junior Cybersecurity Associate (CJCA)**
- Completed HTB Academy job-role paths aligned to CDSA, CPTS, and CWES; certification exams planned, with CDSA first.

TECHNICAL SKILLS

Security operations: Microsoft Sentinel, Splunk, KQL, SPL, Elastic/Kibana, Azure Monitor, log correlation, alert validation, timeline analysis, MITRE ATT&CK

Endpoint and identity: Windows Event Logs, Sysmon, PowerShell logging, Active Directory, Entra ID, Group Policy, DNS, DHCP, Windows Server

DFIR: Wireshark, Volatility 3, Autopsy, KAPE, Chainsaw, RegRipper, Eric Zimmerman tools, FTK, IDA, PCAP analysis

Assessment and platforms: Nmap, NetExec, BloodHound, Burp Suite, Impacket, Kali Linux, Parrot OS, CSI Linux, Windows 10/11, Ubuntu, VMware, Docker, Git/GitHub

Scripting: Python, Bash, PowerShell

TECHNICAL PROJECTS

ENTERPRISE SECURITY AND ACTIVE DIRECTORY LAB | Home Lab | 2026

Microsoft Sentinel | Splunk | Active Directory | Sysmon | VMware

- Designed an isolated multi-platform lab with DC-01, WIN-01, WIN-02, SPLUNK-01 on Ubuntu, Kali Linux, Parrot OS, CSI Linux, a forensic-analysis environment, and cloud-based Microsoft Sentinel.
- Populated Active Directory with BadBlood and configured users, groups, OUs, Group Policy, DNS, authentication auditing, PowerShell logging, Sysmon, Azure Monitor Agent, and Data Collection Rules.
- Generated controlled authentication and network activity, then correlated Windows Event Logs, Sysmon data, and packet captures to investigate process creation, credential-access activity, and lateral-movement behavior.
- Analyzed password spraying and Kerberoasting telemetry and mapped the behaviors to MITRE ATT&CK T1110.003 and T1558.003; documented detection logic, false positives, and validation steps.

TECHNICAL PROJECTS CONTINUED

INCIDENT INVESTIGATION AND AUTHORIZED SECURITY RESEARCH | Hack The Box | Aug 2023 - Present

- Completed 168 machines, 60 challenges, eight Sherlock investigations, and one Fortress in authorized Hack The Box environments.
- Reconstructed attacker timelines from Windows Event Logs, Sysmon, authentication records, Linux artifacts, and network telemetry during forensic investigations.
- Performed PCAP analysis and produced remediation recommendations while examining credential theft, persistence, suspicious scripts, and lateral movement.
- Maintains nine sanitized HTB machine-note files under publication review, organized around scope, enumeration, validated attack paths, evidence, impact, remediation, and detection opportunities.
- Produced a formal technical assessment report during the CJCA examination and completed authorized service enumeration, vulnerability validation, Active Directory enumeration, web testing, privilege escalation, and remediation analysis.

PROFESSIONAL EXPERIENCE

STRATUS SECURITY MANAGEMENT | Sault Sainte Marie, MI | Aug 2023 - Present

Security Officer | Acting Shift Supervisor

- Monitor and triage real-time CCTV, intrusion-alarm, and access-control alerts across multiple sites; assess scope and resolve or escalate events under documented procedures.
- Investigate physical-security incidents, coordinate officers, clients, and law enforcement, and produce reports preserving event chronology, supporting evidence, actions taken, and disposition.
- Correlate activity across monitoring platforms to distinguish actionable incidents from false positives and identify affected people and assets.
- Prioritize shift workload, train officers on repeatable response workflows, and improve SOP, escalation, and reporting practices while serving as acting supervisor.

UNITED STATES COAST GUARD | Multiple Locations | Jun 2017 - Aug 2023

Gunner's Mate Second Class | Security Program and Asset Accountability Specialist

- Managed readiness, compliance, and accountability for more than 200 controlled assets and over 100,000 inventory items supporting 15 units; maintained auditable records and 100% accountability.
- Sustained an operational security program at 50% staffing during the COVID-19 pandemic and filled a year-long supervisor vacancy while coordinating training, maintenance, inspections, and issue resolution.
- Oversaw six compliance inspections and 14 readiness reports, corrected seven discrepancies, and guided subordinate units through corrective actions and documentation requirements.
- Led or supported more than 15 qualification events involving over 100 personnel and previously qualified 417 personnel while enforcing safety and procedural standards.
- Received the Coast Guard Achievement Medal after contributing more than 480 hours and supporting 20 training events that qualified 60 members.

EDUCATION

SOUTHERN NEW HAMPSHIRE UNIVERSITY | Bachelor of Science | July 2026

Computer Science, Concentration in Information Security

SELECTED TRAINING AND RECOGNITION

Coast Guard Achievement Medal | Coast Guard Good Conduct Award | Leadership and Management School | Electrical Explosives Safety for Naval Facilities, 36 hours
